

TECHNICAL DESCRIPTION

The enamel stripping machine is composed of a transformer and an Abisofix (different types to choose from). The Abisofix consists of an engine block and a cutting head. The cutting head is equipped with 3 hard blades. The rotation of the head causes the blades to be closed. The rotational speed is adjusted with the transformer. The continuous speed variation system allows you to predefine the exact diameter of the cut.

Tecnichal data	MK1	MK3	MK5
Range wire diameter (mm)	0,2÷0,8	0,6÷2,0	1,2÷4,0
Dimensions (mm)	180x55	180x55	180x55
Weight (gr)	500	500	500

IN REASON OF EVOLUTION OF REGULATIONS AND MATERIALS, THE CHARACTERISTICS AS ABOVE REFERRED WILL BE CONSIDERED BINDING ONLY AFTER MANUFACTURER'S CONFIRMATION
